

MOBILE CHARTING AT YOUR PHYSICIANS' FINGERTIPS

SIS Charts Physician Mobile is a mobile EHR that enables physicians and clinical staff to access their SIS Charts platform directly from their smartphone or tablet, anywhere, anytime. Mobile access to SIS Charts allows physicians to view their schedule, prepare their cases, track their patients' location throughout the day, review and sign case attachments and consents, complete orders and medication reconciliation, complete Op Notes, and review past and future cases.

Physician Mobile allows physicians to sign off on any outstanding items remotely without having to return to the facility to do so, saving time and resources, and text message notifications can be sent to remind physicians of outstanding items.

Physician Mobile is included with a SIS Charts subscription and uses the same configurations as SIS Charts, making implementation a breeze. All users need is a mobile device with access to an internet browser and the ASC-specific Physician Mobile URL.

Grants physicians easy, onthe-go access to the SIS Charts EHR on any iOS or Android smartphone or tablet.

Compatible with Your Technology

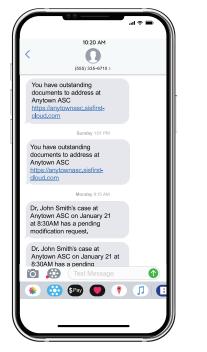

SIS Charts Physician Mobile was specifically designed to be operating system and device brand agnostic. It is not a native application and was built to be accessed by any browser. Users can bookmark the URL as an icon on their home screen so that it has the same look and feel as a native app without the need to update an app to stay current.

An Extension of SIS Charts

The mobile documentation workflow is consistent with the SIS Charts EHR with all the same configurations, so there is no learning curve or training necessary.

01/15/20	ackstone)23 - Female, 28 Orders Med Rec Op Note	>
	DeFenidis)23 - Female, 29	>

From the convenience of their smartphone or tablet, SIS Charts Physician Mobile gives your physicians the power to:

- View their schedule for the day.
- Look at any past or future cases.
- Receive text message reminders for unsigned items.
- Reconcile or sign off on any outstanding items remotely, including case attachments and consents.
- Complete orders.
- Complete medication reconciliation.
- Complete Op Notes.
- Un-sign or add addendums to any Op Note.

Easy Setup

Setting up the Physician Mobile application could not be easier. A trained SIS Support specialist will provide your facility with a unique mobile URL that your staff can gain access to with the same user name and password they use in SIS Charts.

HIPAA Compliant

Because Physician Mobile is not a native application and is instead web-based, ASCs do not have to worry about device management as data will not be stored in the mobile application.
